Re: LEED Initiative Recycled Content

Dear Valued Customer,

EXLTUBE purchases 100% of our coil from a variety of sources domestically. EXLTUBE does not produce the raw material used to make our products. Thus EXLTUBE cannot provide a broad recycled/scrap content statement and rely upon the recycled/scrap content statements from the mills we purchase coil from. Each of the domestic mills we purchase coil from have provided LEED Initiative Recycled Content letters which are available upon request. To obtain specific recycled/scrap content must be reviewed on a case by case basis.

This letter covers only the products produced by EXLTUBE in North Kansas City, MO. For more specific information please contact myself or your sales representative.

Sincerely,

Jonathan Wolfe
Director of Engineering & Quality
EXLTUBE
